SUMMARY

Founder-operator with 10 years of full-accountability work: 6 years running two businesses end to end (scheduling, payroll, compliance, vendors, books) and 4 years co-founding a Web3 project where I coordinated a distributed team across time zones and owned the treasury. I run my own work through AI workflows I set up and operate myself. Looking to put that operating muscle behind a founder instead of being one.

EXPERIENCE

Bobos of War — Co-Founder & Partnerships Lead

Remote / Web3 • 2020 – 2024

- Ran a founder's calendar in practice: managed 40+ active partner relationships on a weekly cadence for 4 years with my own tracking system — no dropped threads.
- Coordinated cross-team delivery across art, dev, marketing, and community ops; managed a distributed team across time zones, async-first with written briefs and clear owners.
- Owned treasury and budget allocation through a full market cycle; detail-heavy record keeping with real money at stake.
- Handled high-volume founder communications across Discord, Twitter, and email — triage, prioritization, and follow-up at speed.
- Co-founded the project and helped raise over \$2M through community-led GTM.

Bethesda Salon — Co-Owner

Bethesda, MD • 2014 – 2020

- Ran operations for two locations for 6 years: scheduling and payroll for 11 employees, hiring, performance, and conflict resolution.
- Owned licensing, compliance, bookkeeping, and financial reporting — deadline-driven administrative work where mistakes cost money.
- Managed vendor relationships, contract negotiation, and inventory across both locations.
- Full P&L responsibility; grew revenue through pricing, service expansion, and retention programs.

PRIOR EXPERIENCE

Hospitality & Culinary (2012 – 2020): Executive Chef at Driftwood Kitchen (DC) — promoted from Line Cook in 10 months; ran kitchen scheduling, ordering, and service under pressure. Earlier front-of-house roles built fast, polished, customer-facing communication.

AI & TOOLS

I set up and operate my own AI agent workflows. Current example: an automated job-search pipeline on Claude that scans ~45 job sources on a schedule, scores roles against my criteria, discards dead listings, drafts documents, and tracks everything in a ledger — AI drafts, I review and send. Comfortable picking up any scheduling, docs, or expense stack fast; I learned point-of-sale, payroll, and booking systems as an owner because no one else was going to.

CORE SKILLS

Calendar & pipeline management • async written communication • payroll/bookkeeping/compliance • vendor & contract management • event and logistics coordination • AI workflow automation • discretion with sensitive information (treasury, payroll, licensing)
